

When you teach a concept, or a letter sound,
or anything else to a student,
always teach the concept
as if you've never taught that concept before
even if it's the millionth time you've taught it.

This formula should also be exercised even within the SAME LESSON. For example, even if you've already repeated a concept 10 times in the last five minutes of instruction, repeat that concept again, **as if you'd never explained it before.**

Your patience should be reflected not only **in your words**, but also **in the tone of your voice** and **in your mannerisms**. Again, it's actually more important for YOU to develop patience than it is that your child learn to read, because without your patience, he might never learn to read. To summarize everything, let us close with this:

With YOU as your child's teacher,
and by exercising patience and faith in God,
there is no limit to what your child can learn!

In His Service,

Carol Kay

President
